## ... the eighteen pound, transistorized model 300 VISETTE

For the clinical accuracy your heart practice demands . . . and a degree of portability never before approached in the field of 'cardiography' . . . this new Sanborn instrument offers a truly remarkable answer.

In the VISETTE you will find outstanding Sanborn quality and performance, achieved through the latest electronic techniques and the most modern principles of instrumentation. Tiny transistors largely replace bulky vacuum tubes . . . entire circuits are contained in plug-in printed wiring panels no larger than a playing card . . . 'cardiograms are clearly traced on chart paper in a new, convenient width. Innovations such as these have also made possible economies in production, reflected in the comparably lower price of the new 300 VISETTE.

Every design feature, every component in this modern instrument, serves a single purpose: clinically accurate 'cardiograms with the greatest possible convenience. The "Sanborn man" in or near your city can provide complete details, and a demonstration in your office if you wish. And of course you may try a VISETTE (as you can other Sanborn instruments) — before buying, without cost or obligation.

To those who already own the famous Model 51 Viso-Cardiette, the new VISETTE can be an invaluable, "companion" ECG — especially suited to use outside the office, or in hospital wards. Or, for those who prefer a larger instrument, using conventional 6 cm. width recording paper, the "51" is still available at \$845 delivered.

261 Davenport Road, Toronto.

Acute  
inflammation

Note spread of suppuration throughout the tissues and a marked swelling from surrounding edema.

Note regression of edema, swelling and acute inflammation after starting Chymar therapy.

# Chymar®

*the newest and SAFEST  
anti-inflammatory agent*

## Chymar

### What it is...

Chymar is a suspension of the proteolytic enzyme chymotrypsin in oil, for intramuscular use.

### What it does...

Chymar reduces and prevents inflammation irrespective of cause; reduces and prevents edema of inflammatory and traumatic origin; reduces pain; hastens absorption of blood and lymph effusions; restores circulation; promotes healing.

### Why CHYMAR is so safe...

It causes no undesirable local or systemic reactions; has no known contraindications—no known incompatibilities; has no influence on blood clotting mechanism; does not spread infection, but augments the action of concurrently used antibiotics.

### Indications... Prophylactic and Therapeutic

Chymar is indicated in all conditions in which inflammation and edema retard healing. 1) *Accidental injuries*: Black eyes, bruises, hematomas, wounds, burns, sprains, fractures, bursitis. 2) *Surgery*: Biopsies, cellulitis, hernia repair, hemorrhoidectomies, G. I. surgery (to prevent edema and hematomas at site of anastomosis), mastectomies, orchitis, epididymitis, prostatitis, phlebitis, thrombophlebitis, skin ulcers (as an adjunct to Tryptar Antibiotic Ointment). 3) *Obstetrics*: Breast engorgement (postpartum), cephalohematoma, episiotomies. 4) *Eye Diseases*: Inflammation, trauma, edema, hematomas (blood in anterior chamber), pre- and postsurgically.

Supply: 5 cc. vials. Each 1 cc. contains 5000 units of proteolytic activity.
